— About RITE Solutions

Dependable technology environments, designed and maintained properly.

RITE Solutions started with a simple belief: every business, large or small, deserves technology that simply works. From our base in Narowal, Pakistan, we help organizations design, deploy and maintain the systems their operations depend on every day.

We understand the business requirement first, then design infrastructure that is secure, scalable and straightforward to support.

Our integrated approach brings infrastructure, networks, cybersecurity, surveillance, access control and communication together as one maintainable environment. The result is technology aligned with daily operations and ready to grow with the organization.

WHAT GUIDES OUR WORK

Professional expertise

Security-focused design

Business continuity

Customer-focused support

Reliable deployment

Scalable technology

M

OUR MISSION

Practical technology, dependable support

To help organizations create secure, reliable and connected technology environments through practical design, honest advice and dependable support.

V

OUR VISION

A trusted technology partner

To be the technology partner businesses across Pakistan trust when their operations depend on IT - known for doing things properly, the first time.

— Solutions & Services

Seven connected service areas cover the core technology environment of your business - from infrastructure and networks to protection, communication and ongoing support.

01

IT Infrastructure

Servers, storage, data centers, virtualization, Windows Server, Active Directory, Microsoft 365, backup and disaster recovery.

02

Networking & Connectivity

LAN/WAN, structured cabling, fiber optics, enterprise Wi-Fi, point-to-point links, Cisco networking and branch connectivity.

03

Cybersecurity

Firewalls, network and endpoint security, secure remote access, VPN connectivity, monitoring and security infrastructure design.

04

Security & Surveillance

CCTV, IP cameras, network video recorders, remote monitoring, fire alarm, public address and integrated security systems.

05

Access Control

Biometric attendance, time attendance, door access, RFID/card access, visitor management and access integration.

06

Business Communication

IP PABX, IP phones, business telephony, intercom and unified communication solutions for teams of every size.

07

IT Support & Managed Services

Annual Maintenance Contracts (AMC), Extended / On-Call IT Support, server administration, firewall management, preventive maintenance, troubleshooting, and remote or on-site assistance.
